

DATE \_\_\_\_\_

At the time of installation of Sharon Water Supply service, a gate valve may be installed for your use in turning your water off and on, as well as, you may elect to have a pressure regulator installed to control pressure problems. This installation is a one-time service and it is understood and agreed that any future maintenance of the gate valve and/or the pressure regulator is the customer's responsibility and that all water that goes through the meter is to be charged to the customers account. *(circle below as needed)*

I elect to       install       not install       a gate valve.

I elect to       install       not install       a pressure regulator.
